

HOW TO CREATE THE PERFECT BUN

High Bun on the Crown of Head

1. Wet hair thoroughly (showers work best)
2. Brush hair back into a high ponytail. If you are fixing bangs, put **gel** in them before slicking them back.
3. Twist ponytail and begin to wrap it around ponytail into a flat bun. The flatter you can get it, the easier it will be to keep it up.
4. Put several larger **bobby pins** in key places to hold majority of hair in place. (This is the part that usually hurts -- watch out!)
5. Unfold a **hairnet** (that matches hair color), and wrap it once around entire bun, catching loose pieces. Twist around (like you would a rubber band around a ponytail) and cover bun again. Repeat until net is used up.
6. Apply 5 million **hair pins (or bobby pins)** to hide excess hairnet and make bun invincible.
7. Apply enough **hairspray** that all pins could fall out and hair would STILL stay in a lovely bun.
8. Breathe a sigh of relief, give your daughter a hug, and apologize for any permanent damage you may have done to her scalp. ☺
